Arezoo Zare

School of Mechanical and Material Engineering

Washington State University

Dear Dr. Zare,

We are excited to be working with you this coming year on the improvement of mechanical performance for extreme environments project. This document will briefly introduce our team members, their qualifications, skills, and various interests.

Sincerely,

WSUM-PythonApps Team

Douglas Takada

Major: Computer Science

Home Town: Poulsbo, WA

Education

Bainbridge Island High School

Olympic College

Washington State University

- Operating Systems
- Algorithms
- Software Engineering
- Automata Theory
- Theory of Computing
- Computer Architecture
- Cyber Security
- Data Science

Work Experience

Software Engineering Intern, Schweitzer Engineering Laboratories – Pullman, WA

- Used Python and C to automate time-intensive tasks crucial to the Research and Development team.

Teaching Assistant for CPTS 121

- Helped students program in C and teaching fundamental concepts

Skills

C/C++, Python, and R from various school projects

Other Interests

- Snowboarding
- Weightlifting
- Video Games

Daniel Book

Major: Computer Science

Minor: Mathematics

Home Town: San Diego, CA

Education

Washington State University

- Data analysis
- Software Engineering
- Machine Learning
- Statistics
- Algorithms
- Graph Theory
- Automata Theory

Work Experience

Software Engineering Intern, Alternative Energy Materials – Pullman, WA

- Used Python to develop an app to control custom equipment for testing the performance of fuel cells.
- Created a time-series database to store and organize important data.
- Analyzed the performance of various fuel cells under different conditions.
- Developed communication methods for a variety of sensors and controllers.

Skills

Python, C++, C, Java

Other Interests

- Hiking
- Concerts
- Video/board games

Daniel Lee

Major: Computer Science BS

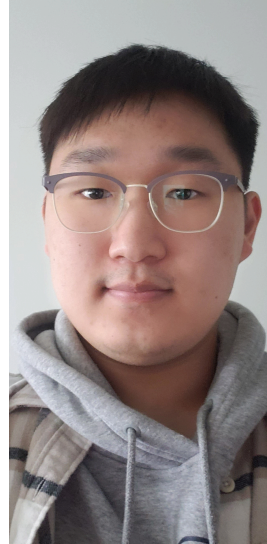

Hometown: Puyallup, WA

Education

Emerald Ridge High School

Washington State University

- Data Structures
- Computer Architecture
- Pro Skills Computing Engineer
- Data Mining
- Software Principles
- Software Engineering
- Cyber Security
- Algorithm Design and Analysis
- Programming Language Design
- Systems Programming
- Artificial Intelligence
- Probability and Statistics

Skills

C, C++, C#, Python, HTML from various WSU courses

Math minor from WSU

Created a spreadsheet and library registration applications from WSU courses

Other Interests

- Video Games
- Music/Saxophone
- Tennis
